Lab Exercises 5 – Content Structure and CSS Page Layout

Aims

- To understand the importance of designing prior to CSS implementation.
- To mark up a document using HTML5 content models for presentation using CSS.
- To learn the techniques and skills required for assignment 1.

Task 1: Structure and Present a Webpage.

In this lab, you will structure a webpage named surveyhome.html and style it as presented below:

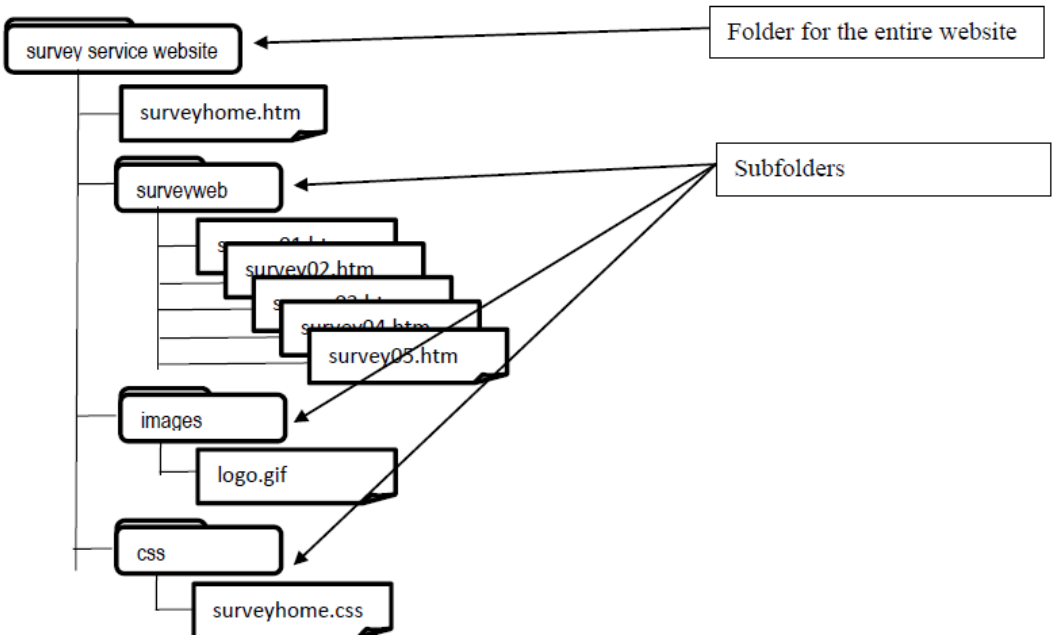

Step 1:

- Use notepad++ to open and edit surveyhome.html.
- Structure the webpage using the relevant elements:
  - <header>..</header>, <nav>..</nav>, <article>..</article>, <section>..</section>, <aside>..</aside>, <footer>..</footer>
  - Other structural elements may also be used.
- Use other HTML elements as needed:
  - Heading <h#>..</h#>, paragraph .. , horizontal rule </hr>
  - List <ol>.. or <ul>.., table <table>..</table>, image <img../> and link <a ..>..
  - Special characters.

Step 2: Folder and CSS file creation

- Create a new CSS file named surveyhome.css.
- Create a folder named CSS and save surveyhome.css in that folder.

- Add the following code into the head section (below the title element) of surveyhome.html. this will link surveyhome.css to surveyhome.html.

  <link href= “css/surveyhome.css” rel= “stylesheet” type = “text/css”/>

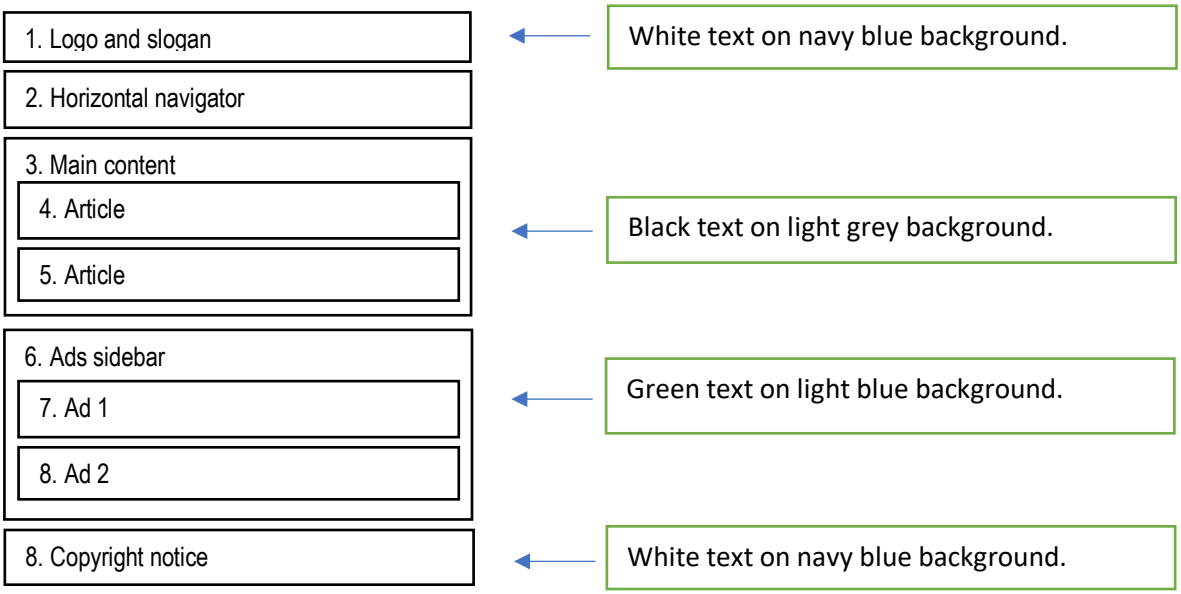

Step 3: CSS Positioning

Complete and apply the CSS rules below applicable HTML structural elements.

- For the <article> under <main> element:
  - Float to the left;
  - Set width to be 65%;
- For the <aside> element:
  - Float to the right;
  - Set width to be 30%;
  - Set font size to be 15px;
  - Set font size to be italic;
  - Set font color to be green;
- For the <footer> element:
  - Disallow other floating elements on both the left and right sides.
  - Set padding to be 5px;

Step 4: CSS Web Typography and Coloring

Create and apply CSS rules to HTML elements.

Step 5: More CSS

Apply more CSS to surveyhome.html as below:

- Complete and apply the following CSS rule to the ***list*** element in the <nav> part of surveyhome.html using an appropriate selector:
    - Float the list element to the left;
    - Remove all bullet point symbols;
    - Eliminate padding and margin; and
    - Make the list occupy the entire width.
- Complete and apply the following CSS rule to the ***<a>*** element in the <nav> part of surveyhome.html using an appropriate selector:
    - Float those <a> elements to the left;
    - Set width to be 6 times the current font size;
    - Remove the underline;
    - Set font color to be white;
    - Set background color to be blue;
    - Set the top and bottom padding to 0.2em;
    - Set the right and left padding to 0.6em;
    - Set the border to 1px, solid and white;
- Complete and apply the following CSS rule to the ***<a>*** element in the <nav> part of surveyhome.html using an appropriate selector:
    - Set the background color of the <a> elements to be brown on ***mouse over***.
- Complete and apply the following CSS rule to the ***<article>*** element in the <nav> part of surveyhome.html using an appropriate selector:
    - Set appropriate width and height; and
    - Set the text box shadow to be 3px 3px 3px 2px #797979;

- Complete and apply the following CSS rule all the <h#> element in the <article> part of surveyhome.html using an appropriate selector:
    - Set the text shadow to be #aa 2px 2px 2px;

Step 6: Validate the page and fix any errors displayed and revalidate.

- Use the validator at http://validator.w3.org to validate your html file.
- Use the CSS validator at http://jigsaw.w3.org/css-validator/ .
