

Lab Exercises 3 – HTML Form and Web site design

Aims

- To represent a form using HTML elements.
- To gain the skills and knowledge to complete assignment 1.

Task 1: Creating a survey website using forms.

Step 1:

- Design a webpage layout that is suitable for a survey website as below:

Survey.html

The diagram shows a web page layout for a survey. At the top is a heading 'Unit Delivery Survey' (labeled 'a'). Below it is a paragraph of text (labeled 'b'). The form is enclosed in a fieldset (labeled '1') with a legend (labeled '2'). Inside the fieldset, there is a label and text input for 'Name (Optional)' (labeled '3'), a label and radio buttons for 'Gender' (labeled '4'), and a label and select dropdown for 'Degree of Program' (labeled '5'). Below the fieldset are 'Submit' and 'Reset' buttons (labeled '6'). At the bottom are 'Previous' and 'Next' hyperlinks (labeled '7').

a	Using heading style 1 for the heading
B	Using paragraph element for the paragraph
1	Fieldset element is used
2	Legend element is used
3	Using label and input (text) for Name
4	Using label and input (radio button) for Gender
5	Using label and select (option) for Degree of Program: IT/Multimedia/Design
6	Insert Submit and Reset button for the form
7	Create a hyperlink for "Next" where it links to next file: survey1.html

Survey1.html

Unit Delivery Survey

Which browser do you know how to use? (Check all that applies)

- ☐ Chrome
- ☐ Firefox
- ☐ Internet Explorer
- ☐ Safari

Which text editor do you know how to use (Check all that applies)

- ☐ Komodo
- ☐ Notepad++
- ☐ Sublime Text
- ☐ Wrangler

Submit Reset

[Previous](#) [Next](#)

Annotations: 1 points to the form container, 6 points to the Submit/Reset buttons, 8 points to the checkbox sections, 9 points to the Previous/Next links.

Survey2.html

Unit Delivery Survey

How do you rate the lecture materials?

☐ Excellent ☐ Good ☐ Fair ☐ Poor

How do you rate the lab materials?

☐ Excellent ☐ Good ☐ Fair ☐ Poor

What do you like best about the unit: (no more than 150 words)

Submit Reset

[Previous](#) [Next](#)

Annotations: 1 points to the form container, 6 points to the Submit/Reset buttons, 10 points to the radio button sections, 11 points to the text area, 12 points to the Previous/Next links.

8	Using label and input (checkbox) for these 2 sections.
9	Create a hyperlink for "Previous" where it links to the previous file: survey.html "Next" where it links to next file: survey2.html
10	Using label and input (radio button) for these 2 sections.
11	Using textarea element for the comment/feedback.
12	Create a hyperlink for "Previous" where it links to next file: survey1.html

Lab Exercise 3

- The survey website will have 3 web pages, starting with a webpage about user, followed by two survey question web pages. Each question webpage will contain:
 - At maximum of 2 survey questions;
 - Links to the previous and next question pages;
 - and a submit button.
 - Name the 3 files: survey.html, survey1.html, and survey2.html
- To help test the forms in this lab, a server script has been created that allows you to test if data from the form is correctly passed to the server when a 'Submit' button is clicked.

Step 2:

- Using notepad++, create the HTML pages for the survey website that contains the following HTML 5 elements. The survey form will be placed between the <body>..</body> tags.

```
<!DOCTYPE html>
<html lang="en">
<head>
  <meta charset="utf-8" >
  <meta name="description" content="Web development" >
  <meta name="keywords" content="HTML (Part 1 - Content - Form)" >
  <meta name="author" content="put your name here" >
  <title>Web Development Survey</title>
</head>
<body>
  <!-- Survey content -->
</body>
</html>
```

Step 3:

- Create the forms and form elements for collecting users' answers using the HTML tags discussed in Lecture. E.g.,
 - Form: <form>..</form>
 - Form elements: <label>..</label>, <input../>, <select>..</select>, <textarea>..</textarea>, <fieldset>..</fieldset> and <legend>..</legend>
- Create other HTML elements as needed e.g.,
 - Heading <h#>..</h#>, paragraph <p>..</p>, horizontal rule <hr>
 - List .. or .., table <table>..</table>, image <img../> and link <a ..>..
 - Special characters.

Step 4: Validate the page and fix any errors displayed and revalidate.

- Use the validator at <http://validator.w3.org> to validate your html file.
